

International Experience

Wolff Landscape Architecture, Inc. (WLA) has provided landscape architectural services on international projects for years. Ted Wolff, Principal, has had extensive international project experience for two decades. In collaboration with Burns + Beyerl Architects, the two firms were the winners of a competition for the Clear Water Fountain project, 150 acres of new housing in Beijing. More recent work includes the Blue Biotechnology project in Qingdao, with the first phase completed in 2012 and construction ongoing, and the CDB project in Beijing, completed in 2007. WLA has worked on projects in the United Arab Emirates, the Kingdom of Saudi Arabia, and Oman. The firm's Middle East experience dates back thirty years to Ted Wolff's project experience while at Skidmore, Owings & Merrill (SOM). The experience of the firm, its principal, and the senior staff enables WLA to provide landscape architectural services throughout the world.
